Objective

Career-focused Computer Science Engineering student aspiring for Software Developer roles. Hardworking and motivated to contribute meaningfully to organizational goals while enhancing technical and professional skills.

Education

Amrita Vishwa Vidyapeetham, Coimbatore

Bachelor of Technology in Computer Science and Engineering 2024 – 2028
CGPA: 7.33 / 10

Sri Chaitanya Junior College, Vijayawada

Higher Secondary Education 2022 – 2024
Percentage: 94.2%

St. Ann's EM School, Tadepalligudem

Secondary Education 2020 – 2022
Score: 530 / 600

Technical Skills

- Programming Languages: C, Python, Java
- Web Technologies: HTML, CSS, JavaScript
- Tools & Technologies: CAD, Arduino

Soft Skills

- Leadership
- Team Management
- Decision Making
- Critical Thinking
- Creativity

Languages

- English
- Telugu

Projects

Number Guessing Game using Python

2024

- Developed a console-based number guessing game using Python.
- Implemented random number generation and user input validation.
- Provided hints and feedback to guide users toward the correct guess.
- Used loops and conditional statements to control game logic.

Fire Fighting Robot using Procedural C*2025*

- Designed and implemented a fire-fighting robot using procedural C programming.
- Interfaced flame, temperature, and obstacle sensors with Arduino UNO.
- Implemented motor control and water pumping mechanisms for fire suppression.
- Conducted extensive testing to ensure accuracy and reliable operation.

Sports Management System using Java*2024*

- Developed a sports management system using Java and object-oriented principles.
- Implemented modules for managing teams, players, matches, and schedules.
- Used Java collections for efficient data handling and storage.
- Ensured proper exception handling and input validation.

Daily Nest – UI Design*2024*

- Designed a responsive and user-friendly interface using HTML, CSS, and JavaScript.
- Developed structured layouts and styling for schedules and content display.
- Implemented dynamic content updates and form validation using JavaScript.
- Focused on usability, clean design, and cross-browser compatibility.
